

Questionnaire for Checking the Minimum Definition of a Learning Management System

**1. Under which type of license is the Learning Management System published?
Please indicate**

2. Is the Learning Management System based on a standard-protocol (TCP/IP) and a standard web browser?

- Yes
- No

3. Can learners interact with teachers, the system and other learners via the browser?

- Yes
- No

4. Does the Learning Management System allow different models of teaching / learning, e.g. support for distance learning scenarios as well as for scenarios in which a distance learning and classroom learning is blended?

- Yes
- No

5. Does the Learning Management System allow authoring of tests and exercises?

- Yes
- No

6. Does the Learning Management System allow the assessment of the learning success e.g. scoring, grading, evaluation?

- Yes
- No

7. Does the system contain basic features for user administration?

- Yes
- No

8. Can the system be localised? Please indicate the difficulty of adding another language to the system.

- Yes, a language can be added very easily.
- Yes, a language can be added easily.
- Yes, but it takes some time and expertise.
- Yes, but it is a lot of hard work.
- No.

9. Are there basic authentication features?

- Yes
- No

10. Is there a rights/permissions management system?

- Yes
- No

11. Can content be managed within the system?

- Yes
- No

12. Can courses be created within the system?

- Yes
- No

13. Can courses be administrated within the system?

- Yes
- No

14. Are any additional products like plug-ins or viewers needed to use the authoring options?

- Yes, but it is not open source. You have to buy a license of _____
- Yes, its open source and you do not have to purchase it. You need _____
- No.

15. Are any additional products like plug-ins or viewers needed to use the learning management functions?

- Yes, but it is not open source. You have to buy a license of _____
- Yes, its open source and you do not have to purchase it. You need _____
- No.
